WORK EXPERIENCE

Software Engineer Development Intern   Aug 2023 - July 2023
AJR Info Systems Pvt.Ltd   *Remote - Hyderabad, India*

- Implemented an integration management system to streamline internal and external API connections, enhancing efficiency.
- Developed both front-end and back-end components, ensuring cohesive integration and optimal performance.
- Integration of APIs using **Postman** Collection to ensure seamless communication between systems.
- Collaborated with cross-functional teams to troubleshoot and resolve integration issues, ensuring project timelines were met.

Full Stack Developer Intern   May 2022 - April 2023
Tamil Nadu Urban Finance and Infrastructure Development Corporation Ltd.   *Onsite - Chennai, India*

- Developed a current technology mobile application using Flutter, facilitating direct communication between people and the government for grievance filing.
- Designed and implemented mobile application prioritizing user needs, resulting in improved complaint handling through efficient photo-based reporting.
- Implemented the use of **Django, Google Cloud Firebase,** and **MongoDB** in storing application data.

Front-End Developer Intern   Mar 2021 - Aug 2021
Seventh Dev Pvt.Ltd   *Remote - Bangalore, India*

- Provided an e-commerce platform for the sale of video lessons on the website.
- Implemented a website utilizing **MongoDB, React.js, and Node.js** some of the most cutting-edge industry stacks.

PROJECTS

Connect App : I'm currently enhancing the "Connect" app's backend with React Native, focusing on secure authentication, efficient real-time data management, and interactive notifications to strengthen campus connections. The work I perform contributes significantly to scaling and ensuring the app's reliability, which directly impacts its performance and user engagement. (Source Code)

Distributed Crowdfunding System : Developed a blockchain crowdfunding platform with **JavaScript** and **Solidity**, integrating **MetaMask** for secure crypto transactions, enhancing functionality with focus on security and user experience. (Source Code)
